

Indian Small Satellite Systems Conference (ISSSC-1)
at ISRO Satellite Centre, Bengaluru
on 28th April, 2010

ISRO has started small satellite program and realized a micro satellite IMS-1 for multiple mission applications.

ISRO encourages the Educational Institutions to make nano/pico satellites under small satellite programme by providing support like guidance & consultancy, s/c level testing and reviews. Presently several institutions are already realizing nano / pico satellites under ISRO's guidance. As a part of this effort, ISRO is conducting a one day conference on Small Satellite Systems on 28th April 2010.

Conference includes paper presentations from ISRO experts related to satellite technology and miniaturization for small satellites and also identified papers from the institutions who are making the nano/pico satellites.
